

## Workshop on Roadmapping Materials needs & Technologies for a strong European Industry

### Scope

- Bring forward the global landscape of Regional/National/European collaborative research & development activities on Materials topics with the focus on materials types and needs versus application fields;
- Roadmap promising Materials technologies within industry led-key challenges;
- Formulate recommendations on future R&D needs on Materials technologies and identify top priorities & funding for upcoming Horizon 2020 programs.

### Agenda (2 hours workshop)

<b>WELCOME &amp; INTRODUCTION</b>	
Introduction to the MATCH project objectives & outcome	30 mins
Presentation of main materials challenges identified in MATCH foresight workshop	mins
<b>WORKSHOP</b>	
Session 1 - Review of Materials topics by challenge	60 mins
Session 2 - Segmentation, time and TRL scaling of reviewed topics prior ranking	20 mins
Session 3 - Review of associated Scientific, Industrial and Societal impacts	20 mins
<b>DEBRIEFING &amp; CONCLUSION &amp; NEXT STEPS</b>	
Overview of Regional/National/European collaborative research & development activities on Materials	20 mins
Towards a sustainable database of collaborative projects to strengthen the cohesion and consolidation of collaborative research & development activities on Materials in Europe	
<b>REFRESHMENTS</b>
